DETAILED ACTION

1. Claims 1-73 are presented for examination.

Election/Restrictions

2. Restriction to one of the following invention is required under 35 U.S.C. 121:
 - I. Claims 1-30, are drawn to a network communication between a user console and a host server, classified in class 709, subclass 203.
 - II. Claims 31-73, are drawn to point rewarding system, classified in class 705, subclass 14.
3. Inventions I, and II are related as subcombination disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. The following case instantiates:

Invention I, discloses a network communication between a user console and a host server

Invention II, discloses a point rewarding system.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. A shortened statutory period for response to this action is set to expire ONE month, or 30 days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned (35 U.S.C. § 133).
